"We've introduced more new products, capabilities, and innovations across the 8x8 platform over the past year than at any comparable period in our recent history," said Sam Wilson, Chief Executive Officer at 8x8, Inc. "We want investors to have greater visibility into that progress, particularly at a time when there is so much discussion about AI and what it will ultimately mean for our industry. For 8x8, AI isn't a future promise or a feature added for the sake of checking a box. We're embedding it across our platform to solve real customer problems, improve interactions, and automate work, and we're seeing customers put those capabilities to use today."
